Name :-

1. What is the shortcut key to display the “Format Cells” dialog box in Excel?
 - a) Ctrl+1
 - b) Ctrl+2
 - c) Ctrl+3
 - d) Ctrl+4

2. What is the shortcut key to create a new worksheet in Excel?
 - a) Ctrl+N
 - b) Ctrl+W
 - c) Ctrl+Shift+N
 - d) Ctrl+Alt+N

3. What is the shortcut key to format a cell as bold in Excel?
 - a) Ctrl+B
 - b) Ctrl+U
 - c) Ctrl+I
 - d) Ctrl+Shift+B

8. The intersection of a column and a row in MS Excel worksheet is known as _____

- a) Row
- b) Cell
- c) Column
- d) Tab

9. Select correct statement

- a) Each Excel workbook can contain multiple worksheets.
- b) Each Excel worksheet can contain multiple workbooks.
- c) Each Excel workbook can contain multiple spreadsheets.
- d) Each Excel worksheet can contain multiple spreadsheets.

10. In MS-Excel to protect a worksheet, you can choose Protection and the Protect Sheet from the.....menu

- a) Edit
- b) Format
- c) Tools
- d) All of the above

Modern College of Commerce & Computer Studies

Affiliated to Savitribai Phule Pune University

Add-on Course for All Stream Students

Course Name	Computer Proficiency
Course Code	MCCCS00024
Duration	30HRS
Credit	2

About the Course:-

A course in computer proficiency typically covers the basics of computer hardware, operating systems, software applications, and the internet. The course may also provide instruction on computer security, data management, and programming fundamentals.

Objective:-

- Use the basic vocabulary and terminology related to computer and word processing
- Open, save and format a basic document
- Type a simple note or a letter using Microsoft Word
- Perform basic format and editing on a word document
- Create tables and calendars
- Use different basic computer language software and programs to practice English and typing skills.

Course Outcome:-

- Set up logical storage locations on your hard drive so that you can easily store and retrieve information.
- Manage your MS Outlook files by using tools such as archiving, storage folders and message rules.
- Create a word document and navigate your way around the basic applications.
- Create an excel workbook and navigate your way around the basic applications.
- Create a professional email signature and learn how to edit and update it with important and timely Company information.
- Create and present a basic PowerPoint presentation complete with headings, bullet points and pictures.

Sr. no	Content	Lectures
1	<p>Managing Your PC and MS Outlook</p> <p>Managing Your PC: This session will give you a basic overview of how the storage folders work on your computer's hard drive. You will learn to create logical storage folders and also learn how to search for files using Windows Explorer. MS Outlook Management: Storage Folders, Creating New Folders, View Options, Archiving, Creating a Professional Email Image: Create an email signature that encompasses your corporate image, Learn to access and update your signature so that you can make timely changes such as seasonal company messages and offers.</p>	6
2	<p>Navigating Word</p> <p>Time Management Outlook Calendar Scheduling appointments Meeting requests Creating tasks Navigating your way around a word document Important Tools Navigating the applications Customization Creating a word document (from a template) Building the document Inserting a picture Inserting a table Editing a table Copy & paste text Printing the document.</p>	6

Course Name	BASICS OF LAPTOP MAINTENANCE AND OS INSTALLATION
Course Code	MCCCS0001
Duration	30HRS

About the Course:

Important for aspiring computer techs to understand everything from computer components, installation of OS, configuration, fixing laptop hardware and troubleshooting etc

Course objectives:

1. To describe the social and professional impact and importance of technology.
2. Identify career opportunities related to technology.
3. Maintain and manage Windows
4. Develop an end-to-end technical understanding

Course Outcomes:-

1. Develop an end-to-end technical understanding
2. Able to perform system installation and peripheral configurations.
3. Reduces potential hardware and software problems
4. Reduces repair costs.

Sr. No	Content	Lectures
1	<p>Module 1: Fundamentals of System</p> <p>Identify the Input/output devices</p> <p>To understand the colour coding for the Ethernet cable to be crimping.</p>	6
2	<p>Module 2: Installation and Configuration of Operating System</p> <p>Concept of BIOS & Operating System,</p> <p>Installation of Windows7, 8, 10 operating system.</p> <p>Installation of Ubuntu Linux operating system, Steps to install software in a computer system</p>	6
3	<p>Module 3:-Configuring Windows Operating Systems</p> <p>Remote network installation, Creating image, Upgrade, Multiboot: Driver installation, Driver installation, software and windows updates</p>	6
4	<p>Module 4: Basic troubleshooting</p> <p>Install, configure, and troubleshoot Windows, Android, and iOS operating systems.</p>	6
5	<p>Module 5: Wi-Fi and Windows Networks</p> <p>Networks Hardware parts that connect to different ports of a computer and laptop.</p>	6

Add-on COURSES for BBA(CA) Students

Course Name	Academic Research & Report Writing
Course Code	MCCCS0002
Duration	30 HRS

About the Course:

Importance of report writing in academics and research. Various kinds of academic and research activities. Necessity of report writing for achievement of academic and research goals. Various kinds of reports / presentations. Characteristics of academic and research reports / presentations. Conclusions. ASSIGNMENTS.

Course objectives:

After completion of the course students will be able: -

1. To become knowledgeable
2. To explore and achieve academic and research goals

Course Outcome:

Demonstrate the ability to choose methods appropriate to research aims and objectives. Understand the limitations of research methods. Develop skills in qualitative and quantitative data analysis and presentation. Develop advanced critical thinking skills

Course Content

Module 1: Research paper writing:

Types of research papers, Structure of research papers, Research paper formats, Abstract writing, Methodology, Results and discussions, Different formats for referencing, Ways of communicating a research paper. ASSIGNMENTS

Module 2: Thesis writing:

Structure of a thesis, Scope of the work, Literature review, Experimental / computational details, Preliminary studies, Results and Discussions, Figures and Tables preparation, Conclusions and future works, Bibliography, Appendices, ASSIGNMENTS.

Module 3: Tools and Techniques:

Various word processors, e.g., MS Word, Libre-office, Latex etc. Making effective presentations using Power Point and Beamer, Uses of plagiarism detection tools. ASSIGNMENT.

Web Designing, Development and Hosting Course for All Stream

Course Name	Web Designing, Development and Hosting
Course Code	MCCCS00003
Duration	30HRS
Credit	2

About the Course:-

A Web Designing course belongs to the field of Computer and IT. It enables students to learn various techniques, tools and programming languages in order to create and maintain web pages.

Objective:-

- Understand the principles of web design, including layout, color theory, typography, and user experience.
- Learn how to create and edit web pages using HTML, CSS, and JavaScript.

Course Outcome:-

- Understanding the principles of web design and the technical skills required to create, design, and host a website.
- Being able to create and edit web pages using HTML, CSS, and JavaScript and create graphics and designs for web pages using software such as Adobe Photoshop and Illustrator.

Sr. no	Content	No of Lectures	No of practical
1	HTML <ul style="list-style-type: none"> HTML documents are described by HTML tags. Each HTML tag describes different document content 	2	3
2	HTML CSS <ul style="list-style-type: none"> Learn how to use HTML and C55 to make web pages. HTML is the mark-up language that you surround content with, to tell browsers about headings, lists, tables 	3	3
3	Java Script and PHP <ul style="list-style-type: none"> How to pass variables and arrays from PHP to JavaScript, both with and without the use of JSON. 	9	4
4	Database MySQL <ul style="list-style-type: none"> MySQL Create Database - Learn My5QL from basic to advanced covering database programing clauses command functions administration queries and more 	5	4
5	Hosting <ul style="list-style-type: none"> Hosting and Creating Domain Register a domain name and transfer domains. Reliable web hosting and VPS. Powerful website 	1	2

Course Name	CONSTITUTIONAL VALUES AND FUNDAMENTAL DUTIES
Course Code	MCCCS00019
Duration	30HRS
Credit	2

About the Course:-

Law practitioners include famous people like Mahatma Gandhi, Nelson Mandela, Ram Jethmalani, as well as former US President Barack Obama. The scope of the law as a career is immense in India as opportunities expand in corporate houses, law firms, law agencies, administrative services, and the like. These days, law graduates not only get dressed in black and white apparel to represent the court but also make their presence felt with groundbreaking cases and legal reforms to make a difference

Objective:-

- Enrich students with knowledge and relevance of the constitution.
- Develop awareness about duties and values.
- Inculcate a sense of constitutionalism in thought and action.

Course Outcome:-

- Understand the constitution and its relevance
- Appreciate the values and goals embedded in the constitution.
- Apply the spirit of fundamental values and duties in everyday national life.

Sr. no	Content	Lectures
1	Constitution of India- An Introduction <ul style="list-style-type: none"> • Federal Republic, Rule of Law, Separation of Powers • Sovereignty, Socialism, Democracy • Secularism and Sarva Dharma Sama Bhava 	5
2	Constitutional Values <ul style="list-style-type: none"> • Justice: Social, Political, Economic • Liberty: Thought, Expression, Belief, Faith, Worship • Equality: Equality before law & equal application of laws • Fraternity: Dignity, Unity and integrity 	7
3	Fundamental Duties <ul style="list-style-type: none"> • Reflecting on the ancient Indian notions of righteousness and duty consciousness • Fundamental duties article 51A • Legal status of fundamental duties- Judicial approach 	8
4	Practical component (if any) <ul style="list-style-type: none"> • Reflections on some of the constitutional values or fundamental duties and its contemporary relevance in day to day National Life through group discussions and projects • Conduct workshops to spread awareness on the fundamental duties and values • Students are required to conduct a survey on assessing the awareness of the constitutional duties among the citizens minimum 25 respondents • Students mein share their experience on fundamental duties and values in the form of a project report • Any other practical or practice as decided from time to time 	10

Leadership skills Course for All Stream Students

Course Name	Leadership skills
Course Code	MCCCS00040
Duration	30HRS
Credit	2

About the Course:-

A leadership skills course is a structured program designed to enhance individuals' leadership abilities and develop their potential as effective leaders

Objective:-

- 1)Enhancing leadership abilities.
- 2)Building self-awareness.
- 3)Developing communication and interpersonal skills:
- 4) Promoting teamwork and collaboration.

Course Outcome:-

- 1) **Improved leadership abilities:** Participants will have developed a stronger set of leadership skills, enabling them to effectively lead teams, projects, or organizations.
- 2) **Ethical leadership:** Participants will have a deeper understanding of the importance of ethics and integrity in leadership, and they will be equipped to make ethical decisions and lead by example.

SR.	Content	Lectures
1.	Introduction to Leadership: An overview of leadership concepts, theories, and styles.	2
2	Self-Assessment and Self-Awareness: Understanding personal strengths, weaknesses, values, and leadership style.	2
3	Emotional Intelligence: Developing emotional intelligence to understand and manage emotions, build relationships, and empathize with others.	4
4	Decision-Making and Problem-Solving: Strategies for making informed decisions and solving complex problems.	4
5	Strategic Thinking: Developing the ability to think strategically, set clear goals, and align actions with a larger vision.	6
6	Strategic Thinking: Developing the ability to think strategically, set clear goals, and align actions with a larger vision.	6
7	Team Building and Team Management: Techniques for building and managing high-performing teams, fostering collaboration, and motivating team members.	6

ANNEXURE I

COURSE NAME : Advanced Microsoft Excel Syllabus

COURSE DURATION : 30 HOURS (30 DAYS)

COURSE OBJECTIVE :

The objective of this course is to enhance the operational efficiency of any knowledge professional by imparting crucial skills in MS Excel

COURSE OUTCOME :

- Use advanced functions and productivity tools to assist in developing worksheets
- Manipulate data lists using Outline, Auto filter and PivotTables
- Use Consolidation to summaries and report results from multiple worksheets
- Record repetitive tasks by creating Macros
- Use Hyperlinks to move around worksheets.

This program will enable the students:

- To gain knowledge on basic as well as advanced excel concepts and functions
- To understand the practical application of the basic as well as advanced excel concepts
- To develop their thought process in such a way so as to apply their learning's in their educational or professional life

ELIGIBILITY : 12th Pass

TOTAL SEAT : 50

Detailed syllabus is given below:

Module 1. Excel Introduction

- An overview of the screen, navigation and basic spreadsheet concepts
- Various selection techniques
- Shortcut Keys

3

Module 2. Customizing Excel

- Customizing the Ribbon
- Using and Customizing AutoCorrect
- Changing Excel's Default Options

5

Module 3 Using Basic Functions

- Using Functions – Sum, Average, Max, Min, Count, Counta
- Absolute, Mixed and Relative Referencing.

5

Module 4. Formatting and Proofing

- Currency Format
- Format Painter
- Formatting Dates
- Custom and Special Formats
- Formatting Cells with Number formats, Font formats, Alignment, Borders, etc
- Basic conditional formatting

3

Module 5. Mathematical Functions and Protecting Excel

- SumIf, SumIfs CountIf, CountIfs AverageIf, AverageIfs, Nested IF, IFERROR Statement, AND, OR, NOT
- File Level Protection
- Workbook, Worksheet Protection

5

Module 6. Text Functions

- Upper, Lower, Proper
- Left, Mid, Right
- Trim, Len, Exact
- Concatenate
- Find, Substitute

5

Module 7. Date and Time Functions

- Today, Now
- Day, Month, Year
- Date, Date if, DateAdd
- EOMonth, Weekday

5

Module 8:Advanced Paste Special Technique

- Paste Formulas, Paste Formats
- Paste Validations
- Transpose Tables

5

Module 9. Sorting and Filtering

- Filtering on Text, Numbers & Colors
- Sorting Options
- Advanced Filters on 15-20 different criteria(s)

5

Module 10. Printing Workbooks

- Setting Up Print Area
- Customizing Headers & Footers
- Designing the structure of a template
- Print Titles –Repeat Rows / Columns

5

Advance Excel

Module 11. What If Analysis

- Goal Seek
- Scenario Analysis
- Data Tables (PMT Function)
- Solver Tool

5

Module 12. Logical Functions

- If Function
- How to Fix Errors – if error
- Nested If
- Complex if and or functions

3

Module 13. Data Validation

- Number, Date & Time Validation
- Text and List Validation
- Custom validations based on formula for a cell
- Dynamic Dropdown List Creation using Data Validation – Dependency List

3

Module 14. Lookup Functions

- Vlookup / Hlookup
- Index and Match
- Creating Smooth User Interface Using Lookup
- Nested Vlookup
- Reverse Lookup using Choose Function
- Worksheet linking using Indirect
- Vlookup with Helper Column

8

Module 15. Pivot Tables

- Creating Simple Pivot Tables
- Basic and Advanced Value Field Setting
- Classic Pivot table
- Choosing Field
- Filtering PivotTables
- Modifying PivotTable Data
- Grouping based on numbers and Dates
- Calculated Field & Calculated Items
- Arrays Functions
- What are the Array Formulas, Use of the Array Formulas?
- Basic Examples of Arrays (Using ctrl+shift+enter).
- Array with if, len and mid functions formulas.
- Array with Lookup functions.
- Advanced Use of formulas with Array.

8

Module 16. Charts and slicers

- Various Charts i.e. Bar Charts / Pie Charts / Line Charts
- Using SLICERS, Filter data with Slicers
- Manage Primary and Secondary Axis

3

Course Name	Yoga for Human Excellence
Course Code	MCCCS00012
Duration	30HRS
Credit	2

About the Course:-

Yoga is the art and science of living, and is concerned with the evolution of mind and body. Therefore, yoga incorporates a system of disciplines for furthering an integrated development of all aspects of the individual.

Objective: -

- Understands the importance of good health
- Practices the steps in maintaining mental hygiene
- Develops emotional stability
- Recognizes the importance of yoga in developing moral values
- Learns to do the yoga and asanas

Course Outcome:-

- It is considered a form of physical and mental health yoga that is beneficial for the mind, body, and soul.
- Develop body awareness.
- Learn how to use their bodies in a healthy way.
- Manage stress through breathing, awareness, meditation, and healthy movement.
- Build concentration.

Sr. no	Content	Lectures
1	Introduction to Yoga Yoga: Definition, Meaning, Types and Stages - Introduction of Kriya, Bandha and Mudra - Difference between Asana and Exercise	2
2	Effects of Asana Physical and physiological effects of the following: Padmasana, Paschimottasana, Vakarasana, Vrakshasana, Trikonasana, Shalabhasana, Bhujangasana, Makrasana	4
3	Producers and Benefits of Asanas Sarvangasana, Halasana, Savasana, Sirasana, Mayurasana, Dhanurasana and Surya Namaskar	3
4	Pranayama Practice Meaning of Pranayama - Purka - Kumbhaka - Rechaka - Nadisuddhi - Suryabedhana - Sittaki and Sitkari	3
5	Asanas for Diseases Effects of Asanas on various human systems - Asanas for Diabetes, Blood Pressure, Back pain - Obesity - Yogic Therapy	3
6	Practical	15

Add-on Course for All Stream Students

Course Name	Embedded System
Course Code	MCCCS 000031
Duration	30 Hours
Credit	2

About The Course:-

An embedded systems course typically covers the basics of designing and programming small-scale computer systems that are designed for specific tasks. These systems are often embedded within larger devices or machines, and may be responsible for controlling various functions such as sensor input, motor output, or data processing.

Course Objective:-

- Providing real-time response: Embedded systems are designed to respond to input signals and events in real-time, which means that they must be highly efficient and optimized for speed.
- Controlling hardware devices: Embedded systems are used to control hardware devices such as sensors, motors, and actuators. The software must be designed to interact with these devices through low-level interfaces.
- Minimizing resource usage: Embedded systems are often resource-constrained, with limited processing power, memory, and energy. The software must be optimized to use these resources efficiently and effectively.

Course Outcome:-

- Increased efficiency: Embedded systems are designed to perform specific tasks efficiently, which can lead to increased productivity and reduced costs.
- Improved reliability: Embedded systems are often used in critical applications where reliability is essential. They are designed to operate continuously without failure, even in harsh environments.

Sr. no	Content	Lectures
1	Introduction to Embedded Systems <ul style="list-style-type: none"> • Definition and characteristics of embedded systems • Types of embedded systems • Embedded system architecture 	6
2	Microcontrollers and Microprocessors <ul style="list-style-type: none"> • Difference between microcontrollers and microprocessors • Popular microcontrollers and microprocessors • Overview of instruction sets and memory architecture 	6
3	Programming Languages for Embedded Systems <ul style="list-style-type: none"> • C programming for embedded systems • Assembly language programming for embedded systems • Comparison of programming languages for embedded systems 	10
4	Input/Output (I/O) Interfaces <ul style="list-style-type: none"> • Digital I/O and analogue I/O • Communication interfaces: UART, SPI, I2C • Introduction to sensors and actuators 	8

Stress Management Course for All Stream Students

Course Name	Stress Management
Course Code	MCCCS00028
Duration	30HRS
Credit	2

About the Course: -

This course will provide students with practical tools and strategies to manage stress effectively. The course will explore the causes and effects of stress, and offer techniques to manage and prevent it.

Objective: -

- 1) Understand the definition and causes of stress
- 2) Recognize the effects of stress on physical and mental health
- 3) Identify personal stressors and triggers
- 4) Learn techniques to manage and prevent stress
- 5) Develop an individual stress management plan

Course Outcome: -

- 1) Recognize the symptoms and causes of stress
- 2) Apply practical stress management techniques, including mindfulness, cognitive, physical, social, and lifestyle techniques
- 3) Develop an individual stress management plan to prevent and manage stress effectively
- 4) Understand the importance of stress management for overall well-being and productivity.

Sr. no	Content	Lectures
1	Understanding Stress <ul style="list-style-type: none"> • What is stress? • The physiology of stress • The impact of stress on the mind and body • Identifying common sources of stress 	4
2	Cognitive Strategies for Managing Stress <ul style="list-style-type: none"> • Challenging negative thinking patterns • Developing a growth mindset • Increasing resilience • Mindfulness and meditation techniques 	6
3	Behavioural Strategies for Managing Stress <ul style="list-style-type: none"> • Time management and prioritization • Setting boundaries and saying no Relaxation techniques, such as deep breathing and progressive muscle relaxation Sleep hygiene and the importance of rest 	6
4	Social Strategies for Managing Stress <ul style="list-style-type: none"> • Building a support network • Communication skills and conflict resolution • Social connection and the impact of loneliness on stress levels • Developing a positive social identity 	4
5	Implementing Stress Management Techniques in Daily Life <ul style="list-style-type: none"> • Strategies for incorporating stress management techniques into daily routines • Developing a personalized stress management plan • Setting achievable goals for stress reduction 	5
6	Final Project and Reflection <ul style="list-style-type: none"> • Students will develop and present a stress management plan tailored to their individual needs • Reflection and self-evaluation of stress management progress throughout the course 	5

Basics of Robotics Course for All Stream Students

Course Name	Basics of Robotics
Course Code	MCCCS00030
Duration	34 HRS
Credit	2

About the Course:-

The basic of robotics course is designed to provide an introduction to the field of robotics and cover the fundamental concepts of robotics. The course usually covers topics such as robot kinematics, robot dynamics, robot control, robot programming, and sensors and actuators. It is aimed at students who are interested in learning about robotics and want to pursue a career in this field.

Objective:-

- 1) To introduce students to the basic concepts of robotics, including robot kinematics, robot dynamics, robot control, and robot programming.
- 2) To provide students with a fundamental understanding of the design and operation of robotic systems.

Course Outcome:-

- 1) Understand the principles of robot kinematics, dynamics, and control.
- 2) Understand the different types of sensors and actuators used in robotics and their functions.
- 3) Understand the fundamentals of robot programming, including basic programming concepts, programming languages, and programming environments.

Sr. no	Content	Lectures
1	Introduction to Robotics: <ul style="list-style-type: none"> • Understanding the definition, evolution, and applications of robotics. • Overview of the basic components of a robot and their functions 	6
2	Robot Kinematics <ul style="list-style-type: none"> • Cartesian, Polar, and Cylindrical Coordinates • Forward and Inverse Kinematics • Joint Space and Cartesian Space 	5

Add-on Course for All Stream Students

Course Name	PERSONAL GROOMING
Course Code	MCCCS00039
Duration	30 Hrs
Credit	2

Purpose Of the Program: -

Projecting a positive professional image as a representative of your company is vital to your company and your personal success. Before selling a product or your company you must sell yourself first. It is the first impression you give. The course focuses on non-verbal communication and behavioural skills. There will hands on and discussions. The course will provide the knowledge and skills required to project a professional image and confidence in you.

Course Objective:-

- a) Able to use right make up technique to enhance your features.
- b) Able to know which hairstyle is right for your face.
- c) Understand the importance of personal Hygiene, as it is the first step good grooming.
- d) Know individual body shapes for the purpose of selecting clothes and accessories that are complementary as well as professional.
- e) Understand your skin type right skin care to slow down aging process.

Course Outcome: -

- a) Improved hygiene habits: Students may learn about the importance of regular bathing washing hands, and other hygiene practices to maintain good health and prevent the spread of illness.
- b) Self-confidence: Learning about personal grooming can help students feel more confident in their appearance and interactions with others
- c) Understanding of proper dress etiquette: Students may learn about appropriate attire for different occasions and settings, as well as how to dress for success in the workplace.

Introduction to Intellectual Property Rights course (Part 1)

Course Name	Introduction to Intellectual Property Rights
Course Code	MCCCS00032
Duration	30 HRS
Credit	2

About the Course:-

An Introduction to Intellectual Property Rights course would typically cover the various forms of intellectual property, including patents, trademarks, copyrights, trade secrets, and industrial designs. Students would learn about the legal frameworks that govern these forms of intellectual property, including the World Intellectual Property Organization (WIPO) and the various national laws that regulate IP.

Objective:-

- Encouraging innovation and creativity: IP rights encourage people to create new and innovative products, processes, and works of art by providing them with legal protections and economic incentives.
- Protection of investments: IP rights allow inventors, creators, and businesses to protect their investments by giving them exclusive rights to use, sell, or license their inventions, works of authorship, and other intellectual property.

Course Outcome:-

- Understanding the legal frameworks and regulations related to different forms of intellectual property, including patents, trademarks, copyrights, and trade secrets.
- Understanding the economic and social importance of intellectual property in promoting innovation, creativity, and economic growth.

Sr. no	Content	No of Lectures

E-Filing of Income Tax Returns course for all stream students

Course Name	E-Filing of Income Tax Returns
Course Code	MCCCS00036
Duration	30HRS
Credit	2

About the Course:-

An e-filing and tax course typically covers the basics of tax preparation and filing for individuals and businesses. It may include topics such as tax forms and schedules, deductions and credits, record keeping, tax software, and electronic filing.

Objective:-

- Create platform for higher classes
- Groom the Students to work as Tax Consultant

Course Outcome:-

- Understanding the basics of Income Tax: You will learn about the various components of income tax, such as taxable income, deductions, exemptions, and tax rates.
- E-filing process: You will learn about the e-filing process, including registration, login, and filing of income tax returns online

Course Name	FILM MAKING
Course Code	MCCCS00027
Duration	30HRS
Credit	2

About the Course:-

Filmmaking courses can be a great way to learn the art and craft of filmmaking, whether you are a beginner or have some experience in the field. These courses can cover a range of topics, from the basics of camera operation and lighting to advanced topics like screenwriting, directing, and film production.

Objective:-

- To understand the nature and process of film production.
- To learn how to read and analyze film as you would a novel, a poem or a short story
- To familiarize ourselves with certain theoretical ideas presented by major film theorists.
- To learn how to develop, write and revise workable screenplays

Course Outcome:-

- The students acquire the skills of film production
- The students are acquainted with major theories of film

Course Name	MATHEMATICS FOR COMPETITIVE EXAM
Course Code	MCCCS00021
Duration	30HRS
Credit	2

About the Course: -

Mathematics is the science and study of quality, structure, space, and change. Mathematicians seek out patterns, formulate new conjectures, and establish truth by rigorous deduction from appropriately chosen axioms and definitions.

Objective: -

- The basic mathematics to the students. It assumes that the students have minimal knowledge to the subject.
- To help them acquire skills in solving quantitative aptitude by simple methods (mainly based on demonstration).
- During class time students are expected to engage in pair work.
- The main focus of the students will be on quantitative aptitude in short span of time

Course Outcome: -

- Provide a platform to the students for building the fundamentals of basic mathematics for competitive examinations preparation strategy.
- Establish a framework to help students acquire knowledge and expertise necessary to secure employment opportunities in the Government sector.

Course Name	BASIC ECONOMETRICS
Course Code	MCCCS00034
Duration	30HRS
Credit	2

About the Course:-

Basic Econometrics is a course that covers the fundamentals of econometric theory and methodology. The course typically includes topics such as simple and multiple regression analysis, hypothesis testing, statistical inference, time series analysis, and panel data analysis.

Objective:-

- 1) Introduce students to the basic concepts and tools of econometric analysis, including statistical inference, hypothesis testing, and regression analysis.
- 2) Provide students with an understanding of the strengths and limitations of econometric techniques, and how to use them effectively in empirical research.

Course Outcome:-

Students will have a solid understanding of basic econometric theory and methods, and be able to apply these techniques to real-world data.

Sr. no	Content	Lectures
1	Introduction to Econometrics <ul style="list-style-type: none"> • Definition of Econometrics • Types of Data • Steps in the Econometric Analysis Process • Software used in Econometric Analysis 	6

Course Name	EVENT MANAGEMENT
Course Code	MCCCS0005
Duration	30Hrs
Credit	2

About The Course:-

Event management is one of the top trending careers in India as it covers all happenings. Event management is required for informal events like wedding functions, baby showers, birthday ceremonies, and proposal ceremonies. Also, people hire event planners for formal events like award functions, live events for political parties, public speaking or motivational speaking, and entertainment industry-related events. Now, the career option sounds exciting but only those who have studied and learnt the core skills required for event management are successful in the long run.

Course Objective: -

- Understanding the fundamentals of event management: The course aims to provide students with a solid understanding of the basics of event management, including event planning, budgeting, logistics, marketing, and execution.
- Developing event planning skills: The course focuses on honing students' skills in event planning, including understanding event objectives, setting goals, creating event proposals, and developing event concepts and themes.

Course Outcome: -

- Increased knowledge and understanding of event planning and management concepts, principles, and best practices.
- Development of practical skills related to event logistics, budgeting, marketing, and communication.
- Improved ability to handle challenges and solve problems that may arise during event.

Sr. no	Content	Lectures
1	Introduction to Event Management <ul style="list-style-type: none"> ➤ Definition and scope of event management ➤ Historical overview of events ➤ Types of events and their characteristics ➤ Importance of events in various industries 	7

Add-on Course for Students

Course Name	Negotiation and Conflict Resolution
Course Code	MCCCS0008
Duration	30HRS
Credit	2

About the Course:-

This course focuses on the principles and practices of negotiation and conflict resolution in various settings, including personal, professional, and organizational contexts. The course aims to develop students' understanding of the theories and concepts of negotiation and conflict resolution, as well as their practical skills in applying these concepts to real-life situations.

Objective:-

•**Developing Negotiation Skills:** One of the primary objectives of a Negotiation and Conflict Resolution course is to help participants develop effective negotiation skills. This could include understanding the fundamentals of negotiation, such as identifying interests, setting goals, and developing strategies for achieving desired outcomes. Participants may also learn various negotiation techniques and tactics, as well as how to effectively communicate and persuade in a negotiation setting.

•**Understanding Conflict Dynamics:** Another key objective of a Negotiation and Conflict Resolution course is to help participants understand the dynamics of conflict, including its causes, types, and stages. Participants may learn about the different approaches to conflict resolution, such as collaborative, competitive, and integrative approaches, and how to apply them in different situations. They may also explore the psychological and emotional aspects of conflict and how to manage them effectively.

Course Outcome:-

The outcome of a Negotiation and Conflict Resolution course can vary depending on the specific goals and objectives of the course, the participants' level of engagement and effort, and the effectiveness of the instruction. However, here are some potential point-wise outcomes that can be expected from a Negotiation and Conflict Resolution course:

- **Enhanced negotiation skills:** Participants can learn various negotiation techniques, strategies, and tactics that can help them improve their ability to negotiate effectively.

in different situations. This can include understanding the different stages of negotiation, identifying and managing negotiation styles, developing effective communication skills, and learning how to create win-win solutions.

- **Improved conflict resolution skills:** Conflict is inevitable in various aspects of life, including the workplace, relationships, and personal interactions. A Negotiation and Conflict Resolution course can provide participants with tools and techniques to better understand and manage conflicts. This can include learning how to identify the root causes of conflicts, managing emotions in conflict situations, developing effective conflict resolution strategies, and fostering a positive and collaborative conflict resolution environment.

Sr. no	Content	Lectures
1	<p>Introduction to Negotiation and Conflict Resolution</p> <ul style="list-style-type: none"> • Definition and importance of negotiation and conflict resolution • Types of conflicts and their characteristics • Historical and cultural perspectives on negotiation and conflict resolution • Ethical considerations in negotiation and conflict resolution 	6

Public Speaking course for All stream students

Course Name	Public Speaking
Course Code	MCCCS0007
Duration	30HRS
Credit	2

About the Course: -

A public speaking course is typically designed to help individuals develop effective communication skills for speaking in public settings. The course may be offered in various formats, such as in-person classes, online courses, or workshops, and may be tailored for different levels of experience, from beginners to advanced speakers.

Objective: -

- **Speaking skills:** Public speaking courses aim to improve an individual's ability to speak clearly, coherently, and with confidence. This includes techniques for projecting one's voice, using appropriate tone and pace, and utilizing effective verbal and non-verbal communication.
- **Audience engagement:** Public speaking courses emphasize the importance of connecting with the audience and keeping their attention throughout the speech. This includes techniques for engaging the audience through eye contact, body language, and interactive elements.

Course Outcome: -

- **Improved Confidence:** One of the key benefits of a public speaking course is increased confidence in speaking in front of others. Through practice, feedback, and techniques learned in the course, individuals can become more comfortable and confident when delivering speeches, presentations, or addressing an audience.
- **Enhanced Communication Skills:** Public speaking courses often focus on improving communication skills, such as clarity, articulation, and effective use of voice and body language. These skills can be useful not only in public speaking situations, but also in everyday communication, both in personal and professional settings.

Sr. no	Content	Lectures
1	Introduction to Public Speaking <ul style="list-style-type: none"> • Understanding the importance of public speaking • Overcoming fear and anxiety • Elements of effective communication • Setting personal goals for the course 	3
2	Audience Analysis <ul style="list-style-type: none"> • Identifying target audience and their characteristics • Adapting speech content and style for different audiences • Understanding cultural and diversity considerations in public speaking 	3

Public Relation's & Media Relations Course for All Stream Students

Course Name	Public Relations & Media Relations
Course Code	MCCCS0006
Duration	30 HRS
Credit	2

About the Course: -

Public relations and media relations are two closely related fields that focus on managing communication between an organization and its stakeholders, including the media, the public, customers, employees, and other relevant parties.

Objective: -

The objectives of public relations (PR) and media relations are to effectively manage and maintain positive relationships between an organization and its target audiences, including the media, with the goal of building and protecting the organization's reputation. Some specific objectives of public relations and media relations include:

- **Building and maintaining a positive image:**

PR and media relations aim to create and maintain a favourable image of an organization among its target audiences, including the general public, customers, employees, investors, and other stakeholders. This involves managing the organization's communication efforts to ensure that its messages are consistent, credible, and align with its values and goals.

- **Enhancing brand awareness and visibility:**

PR and media relations help to increase the visibility and awareness of an organization's brand or products/services through strategic communication efforts. This may include media coverage, press releases, media events, and other tactics that help to raise the organization's profile in the media and public eye.

Course Outcome: -

The outcome of a course on public relations and media relations would vary depending on the specific course curriculum, duration, and level of instruction (e.g., introductory, intermediate, advanced). However, some common outcomes of such a course may include:

- **Knowledge of Public Relations:** Students will gain an understanding of the principles, concepts, theories, and practices of public relations, including its history, functions, and role in modern organizations.
- **Media Relations Skills:** Students will develop skills related to media relations, such as crafting press releases, pitching stories to journalists, conducting media outreach, and managing media inquiries.
- **Communication Strategies:** Students will learn how to develop effective communication strategies for managing public relations campaigns, creating and maintaining positive relationships with various stakeholders, and managing crisis communication situations.

Syllabus of Public Relations and Media Relations:

Week 1: Introduction to Public Relations and Media Relations

1. Definition, scope, and importance of public relations and media relations
2. Historical evolution and development of public relations
3. Key concepts and principles in public relations and media relations

Add-on Course for All Stream Students

Course Name	Critical Thinking & Problem Solving
Course Code	MCCCS0004
Duration	30Hrs
Credit	2

About The Course:-

The Critical Thinking and Problem-Solving course is designed to enhance students' analytical and decision-making skills. It focuses on developing their ability to evaluate.

Course Objective: -

- Analyse and evaluate information critically: Students will learn to critically evaluate information from multiple sources, identify biases, assumptions, and fallacies, and determine the credibility and reliability of information.
- Apply logical reasoning: Students will develop skills in deductive and inductive reasoning, identifying patterns, making sound arguments, and evaluating the validity of arguments.

Course Outcome:-

Improved critical thinking skills: Critical thinking courses often focus on developing skills such as analysing, evaluating, and synthesizing information, identifying biases and fallacies, and making informed decisions based on evidence. The outcome of such courses is often an improvement in critical thinking skills, which can be applied in various contexts such as academic, professional, and personal decision-making.
